

# Genius

The compact dimensions make Genius the ideal protagonist for all coffee lovers who desire to have a professional coffee machine at home, and enjoy a perfect espresso as made by a Barista in a coffee shop.

Genius has a user-friendly display to set all the drink parameters and show alerts. Defined by 5 back-lighted selection buttons to program the desired menu.

The machine is equipped with one steam wand to heat and froth milk at the desired temperature, and with a stainless steel output to dispense hot water thanks to which it is possible to prepare infusions and other types of hot beverages in a few seconds.

2 water supply configurations: internal water tank and Jolly solution (tank direct water mains connection).

Genius is matched with KD2, on demand grinder available in black or chrome, and it can also be used with coffee capsules\*.
